

Agent Success as a Service

Generative AI is not one shift, but two

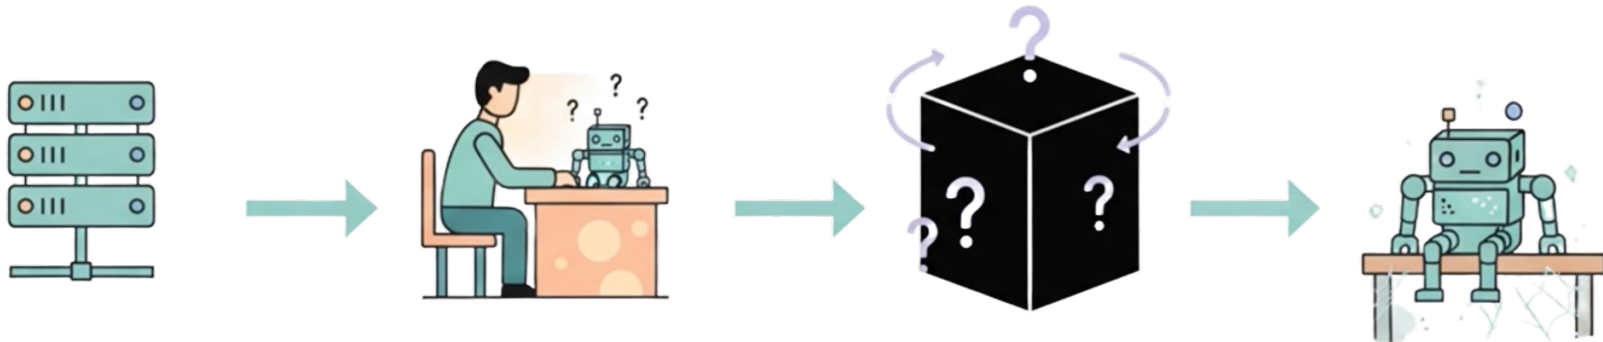

Shift 1: AI as a helpful tool.
From static software to
conversational AI for
individuals

Shift 2: AI as a teammate.
From answering questions
to taking autonomous
action

Abundly focuses on the second shift - on AI agents

Everyone describes building and deploying agents. These often sit unused. Few describe ensuring organizations succeed with them.

IT buys a platform

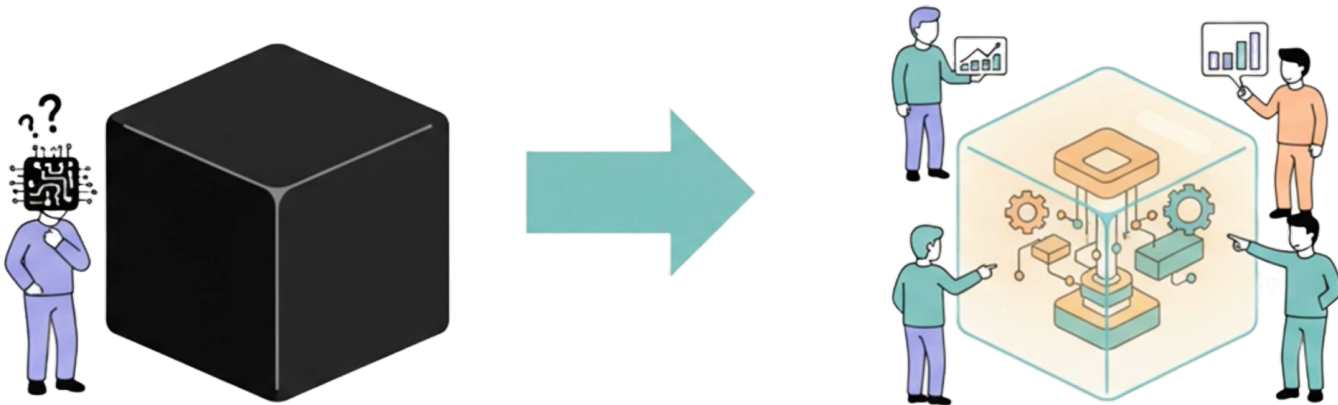

Someone builds an agent

It becomes a black box
No one knows how to iterate

Agent sits unused

This is the gap we fill

Our philosophy centers on augmentation > automation

We believe in fixing the black box problem by empowering domain experts

If we build our customers' agents, we have failed

What is Agent Success?

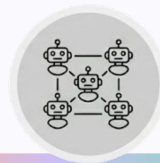

The journey to Agent Success

Factory

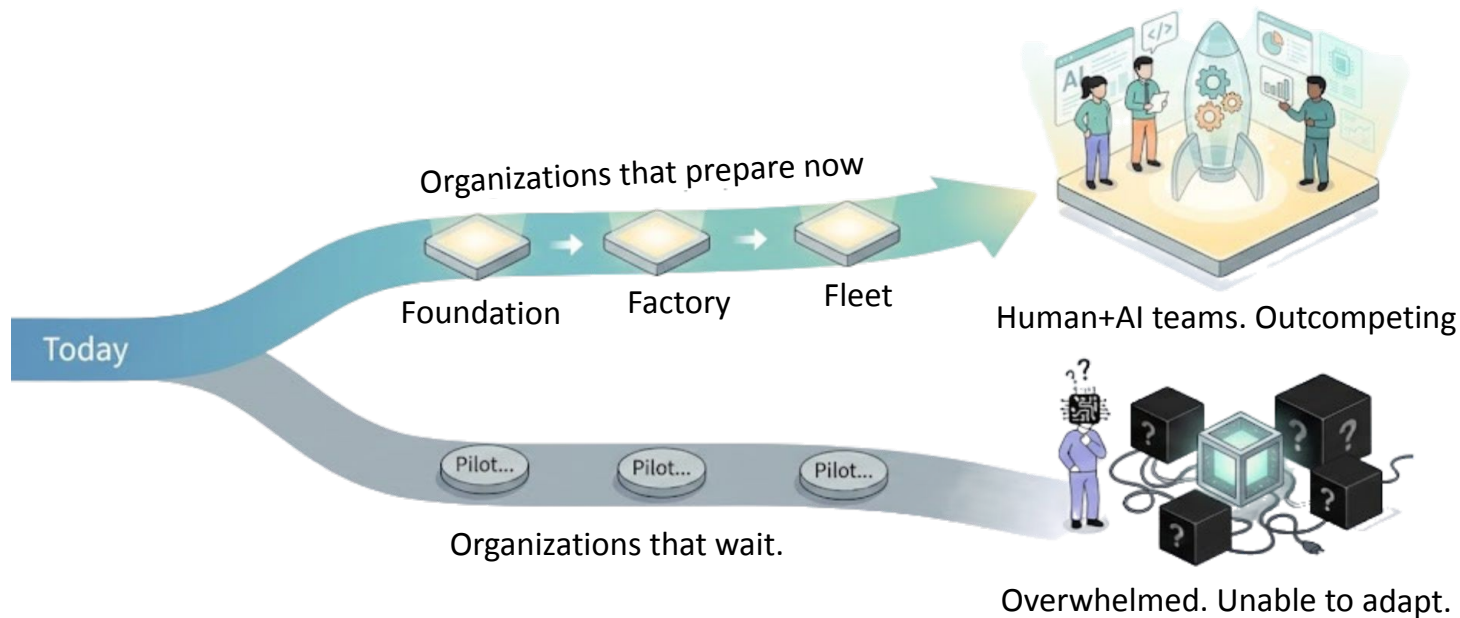

Fleet

The journey to Agent Success

 Agents are becoming dramatically more powerful. Only prepared organizations can capture the value.

The journey to agent-readiness takes time. Start now.

 Why work with Abundly AI?

We help organizations **succeed with AI agents** — not just build them. We combine platform, training, and advisory into one service.

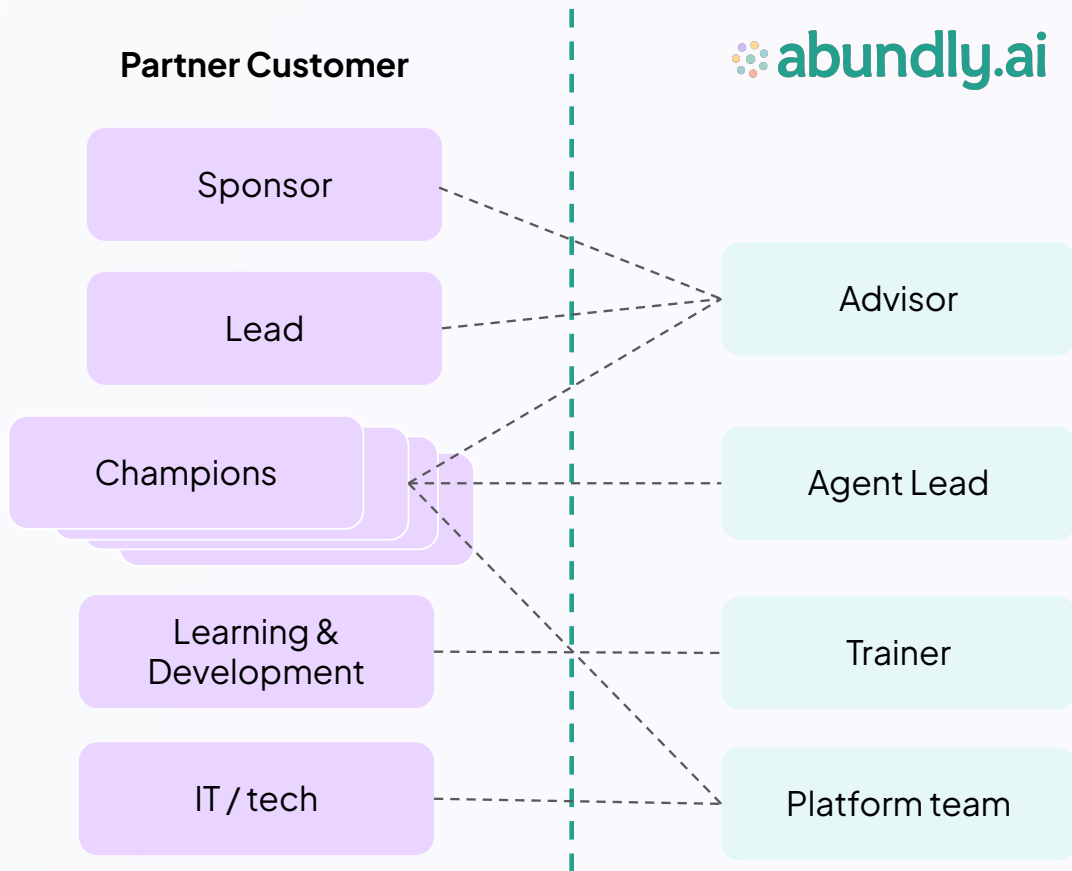

We help our customers **de-risk their adoption** of AI agents - turning a hard challenge into success

We have worked with >200 companies on their journeys to adopt Gen AI and agents, trained thousands, and built countless agents

We work with your coalition to drive impact

Thank you!
